Zoned Comfort Solutions®

Ultimate Comfort
in Any Room with
Lower Energy Bills

Make Yourself
Comfortable.™

Kitchens

Between kitchen ranges, appliances and dishwashers, it can get pretty cramped in the kitchen. Where wall space is scarce, a ceiling-recessed unit is a good fit.

Attics and Home Offices

Transform an attic or garage into a comfortable working environment. Use the minimum amount of energy to maintain your desired indoor temperature.

**A better way to heat and cool
any space, anywhere.**

Better Air Quality

Filtering air by zone removes allergens like dust, mites, pollen, while killing bacteria and deodorizing.

Increased Efficiency

INVERTER-driven compressor technology and zone-by-zone control results in up to 40% energy savings.

Hyper-Heating

Hyper-heating INVERTER® (H2i®) heat pump technology delivers reliable, clean, and eco-friendly heating down to -13° F.

Whisper Quiet

Indoor units run quieter than a whisper while outdoor units are quieter than a normal conversation.

Smart Controls

Use the smart kumo cloud® app, with voice activation, to control your system remotely.

Constant Comfort

Heating and cooling zone-by-zone means better temperature control and constant personalized comfort.

Customize Your Comfort and Look

Mitsubishi Electric has a Zoned Comfort Solution® that fits your unique needs. Because our systems focus on individual living spaces rather than treating every room the same, it's more customizable, more energy efficient and easier to install.
